

# What You Get with EightShapes Unify

Asset	Description	File Type	Samples	Where You'll Find It
<b>Deliverable Template</b>	A starting point for any paginated PDF document (such as a letter landscape, 8.5x11 sized doc) that you want to publish and send to other people.	Template (INDT)		/deliverables/
<b>Deliverable Elements</b>	Individual symbols for annotating designs, creating sitemaps and plans, reviewing sites, framing artwork, and more.	Library (INDL)		/deliverables/_elements/
<b>Deliverable Pages</b>	Patterns for common page layouts in your deliverable documents, whether an annotated page design, color chart, mental model, persona, or something else.	Snippet (INDS)		/deliverables/_pages/ (categorized in subdirectories)
<b>Deliverable Scripts</b>	A way to produce a larger deliverable starting point by combining a deliverable template (above) with deliverable page layouts (above) using an XML "document definition" and invoking a script.	XML file & InDesign Script	<pre>&lt;pages&gt; &lt;page title="Executive Summary" &lt;page title="Table of Contents" &lt;page title="Change History" pa &lt;page title="Approach" pattern &lt;page title="Criteria for Comple &lt;page title="Examples" pattern &lt;page title="[Example Name]" pa &lt;page title="[Example Name]" pa</pre>	/deliverables/_documents/
<b>Wireframe Templates</b>	Starting points for a wireframe, full page design, such as a 960px wide layout with different grids embedded inside it. This template can be resized to design a component "page chunk" instead, too.	Template (INDT)		/wireframes/
<b>Wireframe Elements</b>	Individual, reusable symbols and patterns commonly used across many different page designs, like form controls, menus, buttons, iPhone symbols, advertisements, and more.	Library (INDL)		/wireframes/_elements/
<b>Wireframe Components</b>	Pre-defined page chunks that you can reuse by embedding them in your design files from a standardized library. Components often include not just wireframe content but also an ID marker based on the item's library code.	Snippet (INDS)		/wireframes/_components/
<b>Wireframe Page Types</b>	Pre-defined full page layouts that you can place into a wireframe page, and then remove and/or alter portions to create a new page design.	Snippet (INDS)		/wireframes/_pages/
<b>Documentation</b>	PDFs of EightShapes Unify assets as well as other relevant posters and papers.	PDF		/documentation/
